

**IMMUVIS-P | MARFARMA**

TO ENHANCE THE BODY IMMUNITY  
WITH THE DOUBLE ACTION OF SOD AND GPX

**PRODUCT INFORMATION**

**Active ingredients**

Fermented papaya 250 mg  
Selenium 83 microgram

**Product Classification**

Food supplement

**Packaging**

30 Tablets in 2 blisters of  
15 tablets each inserted  
in a fold box with leaflet

**Administration**

1 tablet daily or based on  
physician recommendation

**Therapeutic values**

Antioxidant; Boosts Immunity; Cures recurrent Infections such as vulvovaginitis, herpes, and vitiligo; Reduces Arthritis Pain; Improves digestion; Prevents prostate cancer; Protects nails and hair; Helps in weight loss and anti-aging

**MODE OF ACTION**

**Fermented Papaya**

It protects the body cells from the destructive effect of free radicals i.e. Hydroxyl radicals; It boosts immunity by revitalizing the activity of Superoxide dismutase (SOD), the major body protector against Superoxide (O<sub>2</sub><sup>-</sup>) free radical.

**Selenium**

It maintains the integrity of the cellular membrane; It stimulates the production of Lymphocyte and interleukin post viral attack; It is an agent in the synthesis of an antioxidant enzyme in the body, the Glutathione Peroxidase (GPX) which protects cells from the devastating effect of oxidative stress.

## PAPAYA MEDICINAL USES

### Fermented Papaya Boosts Immunity and Detoxification

This is the conclusion of multiple research studies over the past decade. Immunity boosted among hospital patients.

### Papaya Improve Digestion

The papain enzyme in the fruit can make protein easier to digest.

### Fermented papaya reduces brain damage from free radicals

Many researchers believe that excessive free radicals in the brain are an important factor for Alzheimer's disease. Alzheimer's patients given a fermented papaya extract for 6 months experienced a 40% drop in a biomarker known as 8-OHdG. An indicator of oxidative damage to DNA, it is also linked to aging and cancer.
